GOOD EDUCATION - A KEY TO SUCCESS

Today is very important to have a good education if you want to find a good job. If you want to be a strong student you have to study really hard and you have to be very diligent. When you finished high school you should go to university to continue your education. Because if you don't, you can't find a good job with good development and good payment.

Studying foreign languages in school is very important if you want to realize in other countries. For example all my class mates study English in school because they want to succeed in other countries not only in Bulgaria. I think that today England offers more opportunity to become one really successful person with very good job and education. So when I finished school and college I hope one day to realize there.

My dream when I finish school is to become a lawyer, but if I didn't study hard I wouldn't do that. Because of this I chose to study in High School of Economics. This school will give me very good base to continue in college where I can study law. And I hope someday to find way to work and develop in England. Of course if I don't have good education my dream can't come true. So now I study really hard and I am really glad that I succeeded to get in that school. Of course this wasn't very easy I have to take my exams. They were difficult but when you have the right motivation it's not so hard.

I absolutely agree that good education is a key to success. When I look at all successful people I admire them a lot and I hope someday when I become one successful and realized person someone to admire at me. This will be enough for me and I will know that all these years of hard work are worth. I would give an advice to all younger person to study hard and to be diligent. You have to follow your dreams and to know that you can become everything you want if you study enough hard of course. And don't forget - future is in your arms but the only key is success.

CHRISTIAN YORDANOV KOSTADINOV

VIII

GOOD EDUCATION - A KEY TO SUCCESS

I think that the key to success is the good education. The good education gives you better chance to have a good job and the good job means a better way of life for us and our family.

My parents always told me to pay attention in class so I can succeed in life.

These days the good education means that you can work almost everywhere you want and almost whatever you want. The good education gives us many chances for a job. The good job gives us a chance for a better future.

Most the kids of my age and my friends think that we don't need to study but when we grow older we are going to need that know age for our everyday life. My desire is to have a good education and prosper in life.

These are most of the reasons why we have to have good education.

TSVETELINA MITSOVA

IX

PGI IVAN ILIEV Blagoevgrad

GOOD EDUCATION - A KEY TO SUCCESS

Good education is the first step that we must take to accomplish our ambitions and that is the most important investment we arrange in our life. We invest in ourselves. That will recover and we will realize that good education is indivisible part of being successful. It is cliché but education is the most important thing today if we want to find a well-paid job. Yes, it is a cliché, but it is more than just true statement – that is with the status of a law nowadays.

Whatever the future delivers to us, good education is important criterion that we must take into consideration if we want to necessitate in the desired by us sphere. This is how the things seem at first glance. We would make a huge mistake if we permitted our success is guaranteed just because we have a good diploma, excellent education and big ambitions – this is just the base on which we must step upon. It would be just too easy if that was all it takes. The talent for what we do and our innate need to do just that – it is something we can never learn in the university, we also cannot bring it up into our personality. We just have it or we don't. Some things must be given to us; it doesn't work even if we tried to get them urging the circumstances. In the daily work we have to give a part of ourselves every day. That is the only way of reaching to the results we would like to see. It is important for us to know who we are and what we want, so that we can orient to that sphere and specialty that we feel we belong to. It is known that the happiest people are those who contrived to turn their hobbies into their profession. And what we all want is happiness. So what is the point of studying or working something we don't feel attracted to? We must be preserving enough to follow our wishes and do what we like the most, because we don't want to be doomed having a job we hate, do we?! Let's choose carefully what we desire to study because this is the key to the door of the success in the field we would like to develop. Studying hard is important, but we should not close our mind and desire of knowledge just to the things we study. To be informed about everything – that is a bonus. The fact you know "everything about something, and something about everything" increases your self respect. So what is the conclusion? We must trace, want and follow our desires.

DENIZ SUNAY HALIBRAM

GOOD EDUCATION - A KEY TO SUCCESS

Every one of us must have a good education if he wants to success in the life. The education is very important for people's life today to realize their dreams. But it isn't the same always .Some people can work hard without any education and they may also be successful. Another people can be really lucky and be at the right place, at the right time and succeed. Some people inherit success. There's not a recipe for success. The real key is to desire it. I believe in that. It helps if you want to find well-paid job. However, there are many cases that disapprove this popular adage. To be a millionaire, it is not necessary to finish a college. You have to use your brain, instincts and follow them. Opportunities like the ones I mentioned, they come once in a lifetime and you should wait for that chance ,but it may never come. Getting a proper education can teach you not only about history or English or mathematics, it also teaches you in discipline, patience, learning skills and the most important thing, how to be a human being. I don't really agree to this statement. It is part of the route to success. There are many other factors like your attitudes, moral education etc. that form the key to success. A good education is necessary in today's world but I don't think it is a guarantee of success. Well, that really depends how you define the word success. If success means having a good life, then a good education can help you to attain a good job. Everyone knows about students who cheat their way through school or those who decide not to pay attention in class. So what is good education? What's important if that one learns? Education is not limited to school and includes life lessons from parents and friends as well. Certainly, a good education will help someone in his life.

DESISLAVA RUMENOVA MITSOVA

XI

PGIM Kyustendil

GOOD EDUCATION - A KEY TO SUCCESS

Nowadays everybody try to receive a good education. That's why today education is a very important thing for a realization of a person. If someone wants to have a good and a good-pay job, he must pay attention to his education. The good education can give you enough knowledge to realize in wish of you sphere. When you work a job you want, you are pleased and that's why young people must obsess their dream. But their dreams can't come true without studying. A good education gives you confidence in your job. Successful parents motivate their children to study in the best schools, in the best specialties and have the best realization.

On the other hand, it is important for the society gives to young people a good education. Young people are the base of the society and that's why they must receive a good education. For a good education is important the base we have. That's why I think that is very important a beginning education for successful realization, but also important is a professional education, which forms our professional orientation. It can help us to find our suitable profession.

Also good education can be look at other point. We can connect an education with the economy. Economy depends on education, because good education gives competent employers. Economy can be unstable if there works unqualified workers.

Every young child heard their parent said 'If you want to succeed you need to finish high school and then go in college'. In all I agree with this opinion, because nowadays there's much competition and a thing which you can rely on is your knowledge, which you receive in your school and college.

All said proves that a good education is the key to success. Success for a person, for a young people and success for society in general. There's reason for old people saying 'If you don't study, you won't go succeed' And, we, young people must think of that. We must study well to come true our dreams.

ILIJANA MIKOVA

Good Education – A Key To Success

Education and success. I think that these words are connected because we have to be well educated if we want to realize our dreams and ambitions. Only with good education you can find the key to success.

In our country there are some problems that make young people stop searching the key to success.

I think that first problem is that a lot of our teachers are very boring. Sorry that I have to say that but it is true. And this is one of reasons why thousands of young people are not interested in studying. How can you be impressed by old boring lady, who knows lessons by heart and just talk, and talk, and talk, without doing anything that can draw students attention. And after that she wants students to know lessons by heart just like her.

Other problem in our education is that we have to choose our high school when we finish 7th grade. In high school you can head up experience for your future but only if you are in right school. For example if you want to be an accountant and you study in high school of economics - that is great! But if you want to be a singer and you study in the same school this is awfully. You will say that who wants to be a singer have to go on high school of music but I will ask you how many kids who are 7th grade know what they are want to do in the future? And here is the answer of the question why some students who study in good school are not well educated.

In spite of all there are a lot of students that are still searching the key to success and I hope that soon we will find it!

ILIYAN KIRILOV SKENDEROV

X

SGI Veliko Tynovo

GOOD EDUCATION - A KEY TO SUCCESS

Education is the base of nowadays society. It is important for young people to study hard because that is the only way they can develop their potential.

Today's young have many possibilities to choose from: like learning economist, accounting, and many others of their kind. For each profession there is a specific school which makes the education better and more concentrated for each student. But the negative thing about the modern professions is that they attacked more and more people every year and with that they "kill" old and more tier some jobs.

Success-that is the thing that every one desire. Infinite knowledge and everlasting appreciation in the sphere of your work is the award that you could win for your hard work.

My opinion of this matter is that every new thing is good for something and that without education you don't have anything in this material world.

MARIAN TANGRA DAMIANOV

X

SGI Veliko Tyrnovo

GOOD EDUCATION - A KEY TO SUCCESS

The old people are saying that if you study hard, you will probably succeed. In nowadays, this saying is true, because without good education you can't find yourself a job. For example to get a prestige work place, you should speak two or more languages. If you study hard, especially the languages in high school, you won't have any problems finding yourself a job. If you have a gift to sing, studying in a musician school will help you a lot to succeed in this field of study. By studying different languages, you can go in another country, and there you could find a better place to live with your family or find a prestige job. You will meet new people. You could make friendships that you will remember for ever.

The good education is not only a key to find good job. With it the other people will know as a clever and serious person. You will be respected. The word "key" in the title symbolists that the key is a subject that you can use to open locked doors. The success is hidden behind a large and hardly opened door. With the key of knowledge you could open this door, and gain the advantages behind. The better education is our guarantee for good life.

MIGLENA PLAMENOVA MINEVA

GOOD EDUCATION - A KEY TO SUCCESS

For a good life you have to have good education. Your dreams can be true if you study in a good school. Today the education is a very important for people's life. People have never worried about financial problems and they don't have to lift a finger to earn money. I've always been told that I need a good education to reach a success. Most of us choose to go to a four year college but someone begins to work. Every one of us wants to realize himself in life. Because of this reason everyone have to study in college. Education is an important component for success. Education helps people in their life. Sometimes people make everything to realize in their life. It's easier if they study and find the key of success. Education is the key to success because it can give you a good start in your life. Everyone has to be a good educational person for success business. We all want to become successful. The education is important for everyone, for their families and their generation. For good education we have to read a lot of books and have to lay effort for good life and realization. You have to learn how to success to save your good features. You can achieve your aims if you have a good education. You have a key to success, when you possess practical skills and training. Good education is a key to success.

NIKOLAY NIKOLAEV VLADKOV

SGI Veliko Tynovo

GOOD EDUCATION - A KEY TO SUCCESS

I think education is very important. If you don't have good education you can't find a good job in future. I think my school has the perfect opportunity when you are 18 years old to find good education in university and find the best job there is.

Every day I hear on Television how successful are the politics and how they are doing with their job . Now that we are in the European Union every Bulgarian person has to good education to work on the good paying jobs in our country.

This year when I entered my new school I was really amazed how awful were the big black boards and that the desks weren't really good. But after 2 months we received new white boards and really good desks which I really enjoy. From the next year we will have uniforms which is a good idea , because they show up how great our school and that we are having the perfect education.

In our town there are all kinds of competitions that have the opportunity to the smart students to develop further education. They win prizes in exchange of their good knowledge.

I always question myself : `` Why did I choose to spend my next 5 years exactly in this school `` Now my mind it's clear and I realize that if I want to success in real life I got to have good education.

If I choose one specific language I got to learn it and know it perfect cause when I get older I can choose to study and work abroad , which is a really good thing cause the conditions in other countries are really good and the salary which they pay is excellent.

We can travel all over the world working in a tour company but for that you got to know languages perfect.

This school has taught me one thing - The success comes to these who know how to succeed!

RONALD YORDANOV HRISTOV

XI

PGIM Kyustendil

GOOD EDUCATION - A KEY TO SUCCESS

Good education is a key to success. No matter what is your school, if your teachers are good, they know a lot and are dedicated to their students and those students might find the key to success. But not all depends on the teachers. The students must have the desire to achieve something great. Because if the students don't want to study, no matter how good are their teachers, the students won't accomplish much. If the students want to find the key to success, they must study hard, they must have an ambition and they must never give up. There are many people, who found the key to success with good education. Bulgaria is now in the European Union and people have a bigger chance for a good realization. And if you study hard you can find your realization in other countries. Many people want to achieve something great, but not all succeed. And that is why you should study even harder.

But nowadays students don't pay much attention to studying. And that leads to a bad education and an unsuccessful realization. But there are people, who prosper without good education. For example a student has rich parents, who own a big firm. The student will find success without much studying. But he won't be in his rightful place, because there will be people, who are smarter than him. But they haven't found a good realization. But if you study hard and have an ambition, sooner or later you will reach your goal. Personally I think that if you study hard you will achieve something great. Also you must believe in yourself, no matter what people tell you.

Therefore study hard, never give up and you will find the key to success.

ROSTISLAVA DIANOVA DIMITROVA

X

SGI Veliko Tyrnovo

GOOD EDUCATION - A KEY TO SUCCESS

Nowadays is hard to find a good job without having good education. You should study hard from the moment you start going to school. The student should be diligent. After graduating high school you should go to college to get a better education.

Almost every person who wants to work in a prestige company should have a good education. People respect people who have studied hard to achieve their goals. As older you get a good education you develop. Getting a good education depends on a person. Your parents also play a part in preparing you to receive a good education. From the first day of school parents want their children to do well in school. They encourage their child to do homework, study, and help them when needed. Parents want the best for their children and will do anything to help them. Choosing the high school plays a main part, too. It is very important that a person chooses carefully every step of his educational development.

My opinion is that it's never late to learn more and many life changing educative processes can begin at any age. You should never let an opportunity passes you by, make every post a winner, use every waking moment of every day and take your own life in your hands and educate yourself in some way each day. Your knowledge will never be good enough. You will always find something new to learn. And as far as your knowledge goes you'll be more and more appreciated. You will have more and more options and opportunities for a job, and that's exactly what success is for me.

In my country people who speak foreign languages can easily find a job. And, of course, they are paid better than people with worse education. Good education opens your door to e better future. If you don't want to be an unskilled worker you have to study hard. But in my country things don't look like this. It's very pity that some people with elementary education become rich thanks to their illegal business, but not thanks to their education. And people with specialized education for all their lives work for a small amount of money. But I believe that if everyone sets himself to achieve a better education, things will go ahead. That's why my opinion is that good education is the key to success.

STEFANI TODOROVA ZGUREVA

GOOD EDUCATION - A KEY TO SUCCESS

The education is a key to success. The education gives us knowledge and abilities which needs us everywhere. It is very important for our future. If we want to come true our dreams we must have a good education. Without it we won't achieve our purpose. Education isn't just a piece of paper that says we have completed the degree requirements. It is about hard work, stimulating thoughts, tasking our brain to go beyond our old boundaries of thinking and searching for answers. If people read a lot of books they will be more educated. If you want to earn more money and have a good business, you have to have very good education. The trick is to maintain a balance. It can be very easy to find yourself spending too much of your time educating yourself each day, and not enough time implementing what you have learned to build your business. The key opens all sorts of doors in front of our success. The good education is important not only for us and our business and future but and for our families. The educational journey begins from birth and should never end.

Every day brings a new experience or opportunity for us. Everyday we learn new things that we didn't previously know. The education is important if we want to have our own business. We must learn now to have a success in the future because we can't back the time. We have to strive in our work and not to be lazy. You must believe in yourself, the success never comes alone.

TEODORA KIRILOVA YORDANOVA

VIII

GOOD EDUCATION - A KEY TO SUCCESS

Everyone needs a good education to be the person that wants. Nowadays we must have a good training in school that will help us in the real life-to have a really good job and to feel well. My parents tell me that I will succeed in my life only if I have a good education. So I must study very hard.

Everyday I go to school and there the teachers tell me the same things that my parents do. With some of the things I am not agree but I do it anyway. To have a good education means to work very hard at school and to be a responsible person to everything and everyone. I try to be the person that will help to the people, to give and to have a respect from them. I am interested in a lot of things but I am not good at all of them. I like the music and dances. A lot of people tell me I am a good actress. I think so too because when I was small I played in one theater in my town. I have met a lot of good actors and they teached me a lot of things.

My parents are great people with perfect jobs. Everything they do is for my future and they want the best for me like every parent to his child. I think the good education can give me more chances to have a perfect life with more good friends.

In our days people with money prospered in their lifes. For me this is not good. The money are a necessity and sometimes a means. But most of us use money for their needs and to make bad things to good people.

Everyone has a position and must tell it. My thoughts for my future are very big. I want to have a good education. If I am a good student and go to college I will be very majestic of my self and I am sure that my parents will be proud of their child.

For me to have a good education is a big dream. I do what I want and I am sure that I will prosper in life. With hard work and with desire I know I will be alright in future.

Finally the good education is the most necessary at this moment for me. I want to be the person with good marks at school and I know it will helps me for the future.

VALENTIN KRUMOV VACHKOV

SGI Veliko Tyrnovo

GOOD EDUCATION - A KEY TO SUCCESS

I think that the education is one of the most important things in life. If you don't have good education you can't find a job. For example if you want to be a qualified worker in bank you must have a high education. I want to go to college because I want to work in bank just like my mother. The politics must have good education because many things depend on them. Many people with good skills are not accepted to work just because they don't have education. When I came to my school I was so amazed because the desks were awful and black boards were in very bad condition but now there is new desks and cool white boards. This is very important part of education. If you have good education you can go to television games and earn some money. Everyday I ask myself : " What will happen to me if I don't graduate." and I still can't find the answer because there are so many opportunities in front of me. Having a good education is very important too if you want to study or work abroad. If you go to life abroad or go on vacation you must know at least English , because in almost all countries English is the main language. In general conclusion the knowledge that you have from high school will help you a lot through the raw life. Success comes to these who know where they go.

VESELKA HADZHIEVA

IX

PGI IVAN ILIEV Blagoevgrad

GOOD EDUCATION - A KEY TO SUCCESS

I think that the education is one of the most important think in people's life. Without education people cannot find good work. Nowadays children do not want to go to school, they prefer playing on computer of surfing on the Internet. But they do not know what they lose.

I am too young to think about the future but everyone has dream. One of my dream is to continue my education in The USA.I really want when I graduate in High School to go to University there.

I finished my main education at Sixth School 'Ivan Vazov' two years ago. And now I am in High School. I like the high school where I study. I love English. Maybe this is a reason why I want to go to The USA and to finish my education there.

After my education's end I want to start working something good. And without education all doors of success are closed. I do not know what I want to work but I know that it must needs very good education. And without education all doors of success are closed for everyone. I know that many people leave our country and go abroad to find better way to live. And I want to go there I want to success. And I think that you should have very good education to success.

I want to success with my English, I want to meet my favorite singers, I want to go to Hollywood to see my favorite actors and actress and so many things. But my biggest dream is to continue my education in The USA. And that is why I think that the most important thing in our live is education and it is the main key to success.

VESELINA NIKOLOVA

XI

PGI IVAN ILIEV Blagoevgrad

GOOD EDUCATION - A KEY TO SUCCESS

Nowadays no one can imagine the world without education. The progress of the technology and all others sciences is due to the centuries of studying and exploring the world around us. The education has become so important that you cannot find a good job if you are not well educated.

The world is getting complicated and even for a simple work you need some level of education. If you want a prestige work you do not need just a good education, you have to be extremely well educated and a professional. Even if you have a high qualification it is a really difficult to get the place in some company that you desire because there are so many other people that want the same thing and you have to show in a lot of ways that you are the best employee.

In our world the successful people are the professionals. To be a professional means that you have to study many years. Your hard work should start when you are child in school. Good marks and getting a lot of knowledge leads to prestige university. The university gives the chance to have a high qualification and to become a professional. If you seize that chance you will be a successful person.

Unfortunately a large part of the students do not realize that the key to success is the good education. They waste their time in playing games, watching television, doing everything else except educating. When the time for going to university came they understand the meaning of studying in school.

The education is one of the most important things in the life for a lot of people and there is no need to wonder why. They know that the key to success is the good education.

VIKTOR VALENTINOV PETROV

SGI Veliko Tŕrnovo

GOOD EDUCATION - A KEY TO SUCCESS

My school SGI is an excellent way to educate yourself .Education is one of the most important things in life .You must study very hard to be successful in life .Not only in our country you need a high education to get a proper job because without learning you will end up a cleaner or another simple job. Our country has just joined the European Union and the process is very slow but eventually it will happen. In SGI in a year we will have uniforms and we have just received white boards and new desks for me that is a sign for good education. High school is very essential for higher learning and if you miss something important it's almost impossible to catch up so you must be very careful in your studying. All the children in high school ask themselves one tough question: "What will happen with me after school?" but the answer is not simple as well and nobody knows. In Bulgaria all sorts of competitions are made. The art of expressing yourself is very necessary in education, because you may have ideas but if you can't express them, no one will notice them at all. Your parents also play an important role in your knowledge. They may help you, but they can also confuse you, because they think it's best for you. The opportunities of good knowledge are that you can go study or work abroad and the payment is higher and the conditions are better than ours. If you want to realize yourself, you must have a proper education, because it is the key to success.

VIKTOR VASSILEV GEORGIEV

PGIM Kyustendil

GOOD EDUCATION - A KEY TO SUCCESS

The good education is a key to success! Yes, that`s right. My parents always tell me to listen in class to learn my lessons and to be good at school. They say that I have to find a good job when I grow up and I can find a good job only if I learn. Nowadays we have to be good at school to help us in the real life.

When I go to school all of my teachers want from me the same thing my parents do – Learn, learn, learn! I think that the good education can give us many opportunities in our life. When we learn we can find the job we want and not to be angry with it I want to be pleased with my job.

I know that some of my friends think that studying is boring and we don`t need it. I also tell them that I think the same way but I don`t. I think that everybody knows that we have to learn hard but not everybody do something about that. There are a lot people that think like me - that we have to be good students but they are not and they do what they want and don`t think about their future. My opinion is that our generation would not prosper because we are very lazy not all of them of course but the bigger part is lazy. My desire is to prosper in life but I can`t do that if I only think for that. I have to be attentive even if I don`t like it because my future depends on that.

Well from all of that I have been telling you we have to understand that without good education there Is no success.

ZAHARI ROSENOV ZAHARIEV

X

PGIM Kyustendil

GOOD EDUCATION - A KEY TO SUCCESS

Education is the key to success and to open our minds to what we can become in our lives.

Education usually defines what we will be in the future – doctors, teachers, musicians and so on. But it's not always like that. Some people use slyness to build their future and are very successful. Others have money from mom and dad which are rich. But for me the only option to be successful in life is to study hard. It's good to study and work hard. It builds up character. And it's my only option... my parents aren't rich and I'm not that sly, I'm very shy.

But the problem is that not everything that I study in my school will be helpful to me in the future. For example accountancy – I don't like, I don't want and I don't need to study it because I am 100% sure that I'm not going to become an accountant. But I have to study it to get good grades to get a scholarship and to impress my parents. We have to study what we want and what we like. That's my opinion. It will motivate us and give us more time to prepare for the job that we wish to work. But that is just my problem... there is a bigger problem. A big part of the teenagers don't want to study anything at all, because they think It's a waste of time. They do other useless stuff like drinking alcohol, going to cafes, playing all day long on the computer. But they don't realize that the only thing they are wasting is their time and their lives. And somehow this problem must be solved. I don't really know how, but the youth must be motivated somehow – bigger scholarships, more free time, longer vacations.

Many hard working people have jobs that they don't really like but earn very good money and their opinion is that they are successful. I think that real success is working what you like and liking what you work. You have to be prepared good for that work and the place where you can get that preparation is school. But I don't get what is the use of all the hard studying and working when in the end we grow old and we all die. Our lives are meaningless. Yeah there are happy, sad, crazy moments but in the end we all end up in a coffin 5 feet under the ground. But that's just my opinion. And it is stupid to waste your whole life In working a work that you don't like. You have to find a job that you like – that brings pleasure to you, a job that is not boring for you and you can do it on and on with hours. And the easiest place to get to know something about that job is school. We are obliged to go to it and it's easier than buying a textbook and trying to study ourselves.

But that's just my opinion. Sorry for wasting your time ☺.

BORISLAVA KIRILOVA STOYANOVA

IX

PGI IVAN ILIEV Blagoevgrad

GOOD EDUCATION - A KEY TO SUCCESS

I believe education is the key to success. There are people who become successful with less education. As athletes, musical artists, actors, and others. Part of success is being able to save money and find a good job, and to be a good student. With an education, the person is able to manage money and save his earnings. Some very rich people have little education yet continue to succeed in life yet these are unique people. Not everyone is able to succeed like those rich people, most need education to guide and strengthen his natural abilities. Education provides a way for intelligent people to ascend above his peers and be successful.

There's nearly six-billion people on this planet, and only three percent of those make it to owning their own successful business. They never have to worry about financial problems and they never have to lift a finger to earn money. The other ninety-seven percent are of course, people who work under successful people who own their own businesses successful. What is the simplest and most lawful way to earn enough to consider yourself a successful person? To receive a good education and to find a good job. Both receiving an education and making a career presuppose one's readiness to work hard, and success without hard work is simply not possible for the vast majority of the world's population.

A good student has to do study everyday. Study involves reading the textbooks, understand them, be able to explain it to others and sometimes memorize the most important concepts. As a creature of habit, it is important to have a special place and a special time to study. A good student will try to find a peaceful place and also try to study during those times that he works best. While studying, a good student can also use this time to do the homework and assigned reading. They are, most of the time, the application of what is covered in class.

Personally, I study every day between the courses hours at the school library.

My definition of the word success: being able to adequately provide for your family, to be sophisticated, to have wealth, to be happy with what you are doing, to be proficient at your career, to be respected, and to be able to reach your lifelong goals. I've always been told that I needed a good education to become successful.

GOOD EDUCATION - A KEY TO SUCCESS

All the parents want the best for their children. They want for them good education, first, because it's the key to success. In nowadays if you want to have a good work you must have good education. It helps you and to have a family because you have money and you can to do the best for your children. Isn't this the meaning of person's live?

Very important for every child's education is it's family, because if they think that the education is important and their child must to be clever, it helps to children's mind about this. And if you parents are with good education and are success in the live, it is like a motive for the young children. If they watch people who have good education and it helps them to find good work, to have a lot of money, and to be a respected person in the society (everybody wants this)

Another very important for every person's education are friends. If your friends think that the education is the key to success you started to think like them. If they go to school every day and study hard, it bias to you. But if your friends aren't good students, if they don't go to school and don't study, you started to be like them – a person without future. Because what person you are, if you are stupid. First, you can't find good work, because in nowadays for good work you must have good education. If you are without education, there are enough people with perfect education, so you are useless. Second, if you aren't educated, it's very easy to manipulate you. And if you are manipulated from other people you haven't got own mind. So you aren't a person, you are just a doll. Everybody can play with you because you aren't educated and you don't know that you are a free person who can think and do what you want.

And what can you give to your family, to your wife and children, if you haven't got good education. The answer is – nothing, because even you love them and want the best for your family you can't do this.

In conclusion I can say that if you want to be a real person in this hard world, and if you want to have a success, you must be educated. It isn't the less way to success, but it is the key to real success.
